RESUME OBJECTIVE

Passionate Data Engineer with 3 years of experience. I possess experience in designing ETL pipelines implementing the crawlers to collect the data and automating the process to help company to gain meaningful insight via data to make productive decision.

SKILLS

Scrapy/ Selenium

Google Cloud Platform & AWS

Python

PostgreSQL

ETL

REST API

LLM

Problem Solving

EXPERIENCE

DATA ENGINEER

ForageAI, Oct 2021 - Present

- Designed a scalable solution using scrapyd to run & control the spiders hosted on AWS EC2.
- Building ETL pipeline to extract the data from the source, transform it and load into database.
- Designing robust CI pipeline from scratch which has been running without failure in the last 1 year.
- Writing scripts and running it on AWS Lambda for shorter durations.

DATA SCIENTIST

HolidayMe, Oct 2020 – Oct 2021

- Developed custom web scraping scripts using tools like Scrapy, or Selenium to meet specific project requirements.
- Conducted data cleaning and preprocessing to ensure accuracy and consistency of scraped data.
- Setting different-2 proxy as per website infrastructure and location to avoid blocking and storing data in database.
- Mapping the data according to its variants to ensure the data quality.
